Dear hiring manager of Bentley,

I am writing to express my interest in the Software Engineering internship at your company. I see Bentley as a great place where everyone is striving for excellence by being open-minded and committed to what they do.

I am passionate about web programming, thus I have a strong desire to continue devoting myself to this field. Having a proven experience of developing websites in my current job position and previous project, I am well-equipped to embark on this journey of learning and growth with Impact Brands. Thanks to my previous roles I acquired skills in various Front End technologies as HTML & CSS, SCSS, Bootstrap, jQuery, JavaScript, NodeJS and version control tools. I am not limited by technical skills only, through my experience both as a team leader and team player I have proved my collaborative skills and gained the motivation to consistently deliver outstanding results.

Upon closer examination of my resume, you will discover that I possess the desired qualifications, including English proficiency and relevant experience. By selecting me for the role, you can anticipate a committed team member who is driven by results and exhibits a proactive approach to task ownership.

Please feel free to reach out to me via this email address and thank you for considering this letter. I appreciate your time and look forward to the opportunity to contribute to the success of Bentley. I am eager to discuss how my skills align with your company's goals during an interview.

Best Regards

Anastasiia Ivanchenko
